

Redmine - Feature #7328

Cloning/Duplicating an Issue with subtasks should allow to clone/duplicate the sub-tasks as well

2011-01-14 09:27 - Daniel Reiche

Status: Closed	Start date: 2011-01-14
Priority: Normal	Due date:
Assignee:	% Done: 0%
Category: Issues	Estimated time: 0.00 hour
Target version:	
Resolution: Duplicate	
Description	
When a parent issue is cloned/duplicated, the subtasks/children are not processed. This should be modified, to allow either clone a parent alone, or with all children, leading to a deep clone of the entire issue tree. Right now, an issue can only be cloned by itself. If, for whatever reason, you want to create a copy of an entire issue tree, you'll have to copy every issue by hand and re-create the parent-child relations in each of cloned issues.

Is duplicate of Redmine - Feature #6965: Option to Copy Subtasks when copying...	Closed 2010-11-23

History

#1 - 2011-01-14 09:36 - Daniel Reiche

Sorry, noticed now that there are two issues referring to the same problem: [#7023](#) and [#6965](#)
please mark as duplicate of [#7023](#), which has a possible solution attached.
