## History

### #1 - 2011-01-15 14:29 - Jean-Philippe Lang

Redmine fail to load jquery-1.4.2.min.js and redmine\_tagging plugin not work properly

With current trunk, it generates a correct script tag:

```
javascript_include_tag 'jquery-1.4.2.min.js', :plugin => 'redmine_tagging'  
=> <script src="/plugin_assets/redmine_tagging/javascripts/jquery-1.4.2.min.js" type="text/javascript"></script>
```

What does your broken script tag look like?

### #2 - 2011-01-20 11:58 - Sergei Danilov

With current trunk, it generates a correct script tag:

```
javascript_include_tag 'jquery-1.4.2.min.js', :plugin => 'redmine_tagging'  
=> <script src="/plugin_assets/redmine_tagging/javascripts/jquery-1.4.2.min.js" type="text/javascript"></script>
```

Javascript look like:

```
<script src="/plugin_assets/redmine_tagging/javascripts/jquery-1.4.2.min.js?1294998561" type="text/javascript"></script>
```

All javasripts in html pages look like

```
<script src="<javascript file>?<magic number>" type="text/javascript"></script>
```

What is the significance of <magic number>?

Javascript **NOT** broken. It's just not inject in html page.
