

Redmine - Defect #7400

E-mail notifications are only sent when user watches issue

2011-01-21 18:28 - Frank de Graaf

| Category: | Email notifications | Estimated time: | 0.00 hour |
| Target version: | | Affected version: | 1.1.0 |
| Resolution: | Invalid | | |
| Description When someone creates/modifies an issue for a project I am assigned to, the e-mail notification isn't being sent to me. My account setting is set to: "For any event on all my projects". The log shows a half empty line (like it can't find the addresses): <code>Sending email notification to:</code> If I watch the ticket and I modify it, the line looks like this: <code>Sending email notification to: phally@example.com</code> Then I actually get the e-mail. So SMTP works fine. | | | |

I have same problem

#2 - 2011-01-28 20:05 - Dmitry Bodunov

I have same problem after upgrade from 1.0.5 to 1.1.0 on gentoo (if this make sense)

#3 - 2011-01-31 09:08 - Christoph Polcin

I have same problem

i had the same problem (on gentoo), database migration didn't work.

check if users.mail_notification is varchar(255) instead of tinyint/boolean,
if not try to proceed the upgrade wiki and don't forget to invoke

rake db:migrate RAILS_ENV=production

i applied the changes from [#4761](#) too.

#4 - 2011-01-31 09:44 - Frank de Graaf

- Status changed from New to Resolved

That indeed fixed the problem. Thanks for your reply. Sorry for wasting your time hehe.

#5 - 2011-01-31 09:52 - Christoph Polcin

i applied the changes from [#4761](#) too.

sorry, i mean [r4761](#).
