Description			
<p>It might be usefull to assign a ticket to a group (support for example) insted of assigning to a singel person.</p> <p>Hint:</p> <p>A Consultant is sending a ticket by Mail, redmine is using imap to fetch. Using CC in the Mail will also reach the Developers by mail AND by Redmine</p> <p>Using a group and inform the members will be better, cause the developer only gets one information.</p>
