My recommendation is to provide the correct translations yourself - you could even update the necessary files and submit them back to the project (they are in the repository in the /config/locales/ directory, you'll want ru.yml - for redmine 1.1 there appear to be a few additional strings added that do not yet have a russian translation).

I'm not sure about submitting the changes back, but you could add the changes as a patch to this bug and I'm sure someone will apply it for the next release.

- File ru.yml added

I'm by far and away distant from development and was not able to create a patch file so please add these strings to the whole ru.yml file. I hope this will help :)

#4 - 2011-01-28 20:46 - Jean-Philippe Lang

I don't see any string in your attachment.

#5 - 2011-01-28 20:47 - Jean-Philippe Lang

- Status changed from New to Closed

- Resolution set to Duplicate

Closing this in favour of [#7469](#).
