Target version:			
Resolution:			
Description			
<p>The general idea is to be able to create projects and tie them to a map (using OpenStreetMaps or Google Maps or something else). Each issue gets just 2 new attributes: lon and lat.</p> <p>Thus, for Redmine new opportunities and new applications</p> <p>Example of application:</p> <p>Use serving services (traffic, utilities, etc.)</p>			

History

#1 - 2011-03-22 20:10 - Jek Sirex

- Assignee changed from Eric Davis to Etienne Massip

Tip: it may be difficult to add this as an plugin but it can be added as an core feature which can be switched on or off

#2 - 2011-03-23 09:13 - Etienne Massip

- Category changed from Core Plugins to Plugin Request

- Assignee deleted (Etienne Massip)

IMHO, this should be done as a plugin in the first time, as this won't be a commonly used feature.
