### Description

A bug using the search on redmine.org (probably also in the latest release, too):

The first line below the search form contains something similar to

- Messages (13)
- Issues (12)
- Changesets (11)

Results (36)

If the option "Search titles only" was previously selected, it is not added via GET to the URL for each of the categories, i.e. "Messages".

Clicking on the links obviously generates a different list where both title and context are matched with the searched phrase. "Search titles only" is deselected.
