I would be quite glad to have this in the "Powered by" section ("Powered by Redmine 1.1.0...")

It used to be displayed but has been disabled because of security concerns, I don't see this coming back in the near future.

Felix is right, it has already been discussed a lot of times ([#1271](#), [#5940](#)..) If it's really important for you, it shouldn't be that difficult to build a plugin to do that. I close this issue for the moment.
