Description

Hi

I have some projects very busy, and some not so busy. Feature would be to display activity of last XX days, where XX is dependent upon activity amount.

level	days
global activity	last 7 days
project activity (with subprojects)	last 14 days
project leaf activity (no subprojects)	last 21 days
project activity that things happen only few times per a month	last 45 days

Currently:

- if I set 5 days, then some less busy projects show no activity for many pages
- if I set 21 days, then global activity and top project activity slows down server performance

Thank you and kind regards
