<b>Description</b>			
<p>I'm using a git repo with redmine and noticed that my very new repository is claiming to have over 5000 commits by me (I haven't committed more than 4 times.)</p> <p>A screen shot is attached.</p> <p>My theory is something to do with non-sequential commit numbers in git.</p> <p>I'm running the svn version of the stable1.1 branch.</p>
