Description

Trying to update my Redmine installation to 1.1.x, I'm having trouble with project's show, i.e. when trying to reach URLs like <http://localhost/projects/launch>.

I'm using Ruby 1.8.7, MySQL 5.0.84, Rails 2.3.5 on both Redmine 1.1.0 and 1.1.1 ([r4888](#), said 1.1-stable). Here is the corresponding log:

```

For both, I unpacked/checked out the Redmine version in its own directory, then made Apache look in that folder for Redmine. So, it

seems every single file is updated.

Did I do something wrong? Is there any bug? If you need any other detail, feel free to ask.
