<b>Target version:</b>		<b>Affected version:</b>	
<b>Resolution:</b>			
<b>Description</b>			
<p>hi, I had implemented LDP authentication, login working fine, but all my plugins menus are with "translation missing: en-GB, label_..." Simple login is working fine and all menus are ok. In application &gt; administration &gt; Display language is English... After that I thought that the language is taken from regional settings, but again I was wrong. What I had observed and this makes me to think it's an issue is that for LDAP authentication the language terms will be read only from Redmine/config/locales/ *.yml, but when simple login is used the plugins terms are read from plugins localization as well. Redmine version 1.0.4 Thank you, Ionut Thanks, Ionut</p>
