<b>Category:</b>	Email notifications	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>			
<b>Resolution:</b>	Duplicate		
<b>Description</b>			
<p>On my redmine install (following trunk), I'm set up to receive notifications for any event on all of my projects, including my own changes.</p> <p>I correctly receive notifications for things like tickets.</p> <p>However, changes to wiki pages do not trigger a notification. Besides tickets, that's the most important thing to watch to make sure people aren't defacing the wiki, adding spam, etc. I'd like to make sure I get those notifications, too.</p>
