

Redmine - Defect #7705

"Jump to project" combo box spills out of screen

2011-02-24 10:49 - Benjamin Baroukh

Status:	Closed	Start date:	2011-02-24
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	UI	Estimated time:	0.00 hour
Target version:		Affected version:	0.9.1
Resolution:	Invalid		
Description <p>The "Jump to project" combo box currently unfolds toward the top of the page. I guess this was to keep the rest of the UI visible. However, when you have many projects, it "spills" above the edge of the screen and no scroll-bar appears.</p> <p>I guess there is two options:</p> <ul style="list-style-type: none">• Either the combo box should unfold to the bottom• Either a scroll-bar should appear. <p>Should be a quick fix anyway. Using Firefox 3.6.13.</p>

That's a standard select box and is taken care of by your browser/OS, I don't think there's anything redmine can do about it.

Indeed, my apologies, I had so memories of being able to decide which side the combo box should unfold to. I checked in Firebug and all seems right. Moreover the combo unfolds to the bottom in Internet Explorer 8 !

So probably a Firefox bug then... Can anyone reproduce this issue in Firefox?

#3 - 2011-02-24 13:45 - Benjamin Baroukh

Very interesting indeed!

It seems to be happening only when Firefox is on my secondary screen. Everything seems OK when Firefox is on my main screen... I will raise a bug on the Firefox side.

- Status changed from Resolved to Closed

- Resolution set to Invalid

OK, closing as this is not a redmine problem, thanks for double-checking :-)
