

Redmine - Feature #7724

Ability to create default forums when a new project is created

2011-02-25 19:08 - Declan Lynch

Target version:	
Resolution:	
Description When a new project is created the project manager needs to create their forum categories before the forums section will be visible to end users. I would like to see a feature added that would allow the Redmine Administrator to define a set of forums that would automatically be created when a new project is created.
