Redmine - Defect #7779

Error 500 when issue description is too long

2011-03-04 14:36 - Jakob Fix

Status:	Closed	**Start date:**	2011-03-04
Priority:	Normal	**Due date:**	
Assignee:		**% Done:**	0%
Category:	Issues	**Estimated time:**	0.00 hour
Target version:			
Resolution:	Duplicate	**Affected version:**	1.1.1

Description

Apparently the length of the issue description (the field I'm typing into right now) is not checked and causes an Internal Error 500. Inserting around 150Kb of text (I know, not a good idea) triggered the error and we had to check the Redmine log to get a better idea of the cause of the error message.

If I understand correctly, the limit of the number of characters in the description field depends on the database field type which in MySql is 2^16 i.e. about 64Kb.

We're using 1.1.1 in a Windows environment with MySql.

Not sure Issues is the right category, or should it be Database?

History

#1 - 2011-03-04 15:43 - Etienne Massip

PostgreSQL stores issue description in a column with text data type which length is unlimited, so adding a limit would be some kind of regression to PG users.
