

Redmine - Defect #7782

category link/query not handling multiple projects for version targets spanning more than one project

2011-03-04 22:52 - Gerry Hawkins

Status:	New	Start date:	2011-03-04
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Projects	Estimated time:	0.00 hour
Target version:		Affected version:	1.0.4
Resolution:			

Description

The category list of issues on the version page has problems with issues that are in different projects.

e.g. a target version is either shared within a project hierarchy or for all projects.
issue 1 is in project A with category NN
issue 2 is in project B with category XX

In the version page for the target version I see the category list having 1 issue in each category. But the link / query is wrong as I can not jump to the other project. The query only works for issues that are in the project I am in when I am on the version page.

[Using 1.0.4]

History

#1 - 2011-03-05 12:41 - Etienne Massip

- Affected version (unused) set to 1.0.4
- Affected version set to 1.0.4
