Target version:	1.1.2			

Description

/issues/changes fails with internal server error when a issue has a custom field.

Here is the stack trace. http://pastie.org/1639290

This is because JournalsController does not declare using custom_fields helper. The attached patch fixes this problem.

Associated revisions

Revision 5021 - 2011-03-06 17:04 - Jean-Philippe Lang

Fixed: error on JournalsController#index when custom fields are present (#7795).

History

#1 - 2011-03-06 17:13 - Jean-Philippe Lang

- *Subject changed from Internal server error at journals#index to Internal server error at journals#index with custom fields*

- *Status changed from New to Closed*

- *Target version set to 1.1.2*

Committed with a failing test in r5021 and merged in 1.1-stable, thanks.
