

## Redmine - Feature #7842

### Creation new users by non-admin user

2011-03-11 16:02 - Aliaksandr Salenka

<b>Status:</b>	New	<b>Start date:</b>	2011-03-11
<b>Priority:</b>	Normal	<b>Due date:</b>	
<b>Assignee:</b>		<b>% Done:</b>	0%
<b>Category:</b>	Accounts / authentication	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>			
<b>Resolution:</b>			
<b>Description</b> It should be very userfull to allow user creation for non-administrativ users. For example - I have redmine instance containing some projects, wana to allow user with project-management role to create new users, but don't want to grant him admin rights for whole instance.			
<b>Related issues:</b>			
Has duplicate Redmine - Feature #14440: Role to create New user			<b>Closed</b>
Has duplicate Redmine - Feature #12449: Role/permission to make new users			<b>Closed</b>

### History

+1

I believe in an automanaged system without the intervention of the administrator each time the organisation require add new members or projects needs to be closed ([#7100](#)).

+1

It would be great :)

#### #3 - 2014-09-08 23:41 - Ariel Lira

Is this issue stil pending in redmine trunk? I need exactly the same: a "create user" permission.  
Also note that tickets [#14440](#) and [#12449](#) seem duplicate of this one.

Thanks

I confirm this is still not possible in current redmine versions. It may not be really difficult to implement on the logic side, but I don't really know how to deal with that in the UI. For now "users management" views are in the admin section, which we can't expose to all users obviously. Any take on that ?

One idea would be extending the role paradigm to admins/user accounts. We then have system roles which would allow more granular permissions.

- Manage projects
- Manage users
  - Create user
  - Modify user
  - Delete user
- Manage system settings
- etc.

**#13 - 2014-12-02 18:36 - Dennis Schridde**

Any news regarding implementation of this?

**#14 - 2016-02-07 11:04 - strait way**

how can I created project for myself

**#15 - 2018-04-16 10:11 - Hans Kaiser**

this feature request is 7y old, are there any updates on this feature?

**#16 - 2018-11-08 16:15 - Ezequiel Nicolazzi**

Any news on this?

**#17 - 2019-04-12 11:09 - Richard Holyoak**

Really need this as I don't want to give full administration control for the whole site to someone who should just be able to manage user accounts.

**#18 - 2020-04-21 04:12 - Ali Hamdan**

It would really be a good feature if we're using redmine as a helpdesk system where the client admin can create users for selected project with the ability for the redmine administrator to register the created user or not.

**#19 - 2020-12-05 19:27 - Igor Rybak**

+1

Needed feature for "registrar" role, which could manage users. And you could allow this role to create/edit/delete users with specific roles.

**#20 - 2022-11-21 23:53 - Kelvin Lomberg**

+1

This would really improve security for us by allowing all our HR employees to create users without having full admin access.
