I think it's not closed.

Alex Belyaev asked to have "Author Group" in the add_filter_select field. We can filter with "Assignee group" but we can't filter with "Author Group". So we can't have the list of issues created by members of a selected group.

Im with redmine 2.2

Maybe we can do this but I don't how to...

Sorry for my english

We can filter with "Assignee group" but we can't filter with "Author Group".

Exactly.

But, ~~"Author Group"~~ "Assignee group" is implemented by [#2964](#) [r6306](#).

So we can't have the list of issues created by members of a selected group.

Feel free to create a new issue.
