

Redmine - Feature #7899

Box for editing comments should open with the formatting toolbar

Description When I press the "pencil" icon for editing an issue comment, I get a mere plain-text editing box with no formatting tools at all. Expected: the editing box should open with a regular rich-text formatting toolbar, like the one used when you create/update an issue.

Very nice addition, indeed.

Just added the relation to [#5520](#) ; adding a preview capacity to comment editing would make it perfect, actually :p
