

Redmine - Patch #7959

Patch for repository revision update (reload)

2011-03-22 19:15 - Brian Lindahl

Status: New	Start date: 2011-03-22
Priority: Normal	Due date:
Assignee:	% Done: 80%
Category: SCM	Estimated time: 0.00 hour
Target version:	
Description	
<p>Software engineers sometimes made mistakes when writing commit messages during commit. This had caused inaccurate revision relations due to the fix-via-commit-message feature (Settings -> Repositories -> Referencing and fixing issues in commit messages). This patch provides a method to reload a specific revision from the repository and re-apply the fix-via-commit-message feature to the new commit message.</p> <p>Note that there are two quirks:</p> <ol style="list-style-type: none">1) if an issue is already related, fix-via-commit-message will not be reapplied (see #2009 for removing issue relations)2) fix-via-commit-message journals entries may be left behind (see #7610 for journal rollback)
