Description

Hello,
I always thank you for your effort to suggest useful plugins.
I will suggest one.
That is to show over date reference to target date.

The screenshot shows a navigation bar with tabs: Calendar, News, Wiki, Files, Import, Watchers, Settings. Below it is a search bar with "Add filter:" and a dropdown arrow. A table is displayed with the following columns: Author, Assigned to, Category, Target version, Start Date, Due date, over date. The first row of data shows: 09/22/2010, 03/16/2011, 6. Above the table, the text "over date = Today - Due date" is visible.

I would be grated if you considered this function to make plugin.
Sincerely, yours.
