

## Redmine - Feature #8138

### Assign Priority based on Category

<b>Description</b>	
<p>I have a rather strange request from a Customer and am wondering if there is already a patch for this somewhere (since I suck at Ruby).</p> <p>The basic Idea is that the category a ticket is in determines it's Priority. I can hide the Priority from the form so users can't set that. But I somehow need to assign the priority based on what category is selected.</p> <p>It would require extending either the data-model, or hacking directly into issues.rb with some before_create method and a switch statement on my categories.</p> <p>Is there an existing patch out there for this? Because I am tempted to simply hack this into issue before_create, but then I'd had to make sure it only runs on this one project etc..</p>

#### History

##### #1 - 2011-04-13 15:38 - Etienne Massip

- Category set to Issues

##### #2 - 2011-04-18 11:54 - Daniel Hoelbling

- File 0001-Implemented-IssueCategory-default-Priority-setting.patch added

I think I fixed the issue myself.

Attached you can find my patch that does this pretty much in the same way as assign\_to is being handled

Unfortunately I am a complete stranger to Rails so I really didn't know how to effectively write a test for this.. (it's all magic!) but from my testing so far it works.

greetings Daniel
