Category:	Wiki	Estimated time:	0.00 hour
Target version:	1.3.2	Affected version:	
Resolution:	Fixed		
Description			
<p>If you have a wiki page with the following structure:</p> <ol style="list-style-type: none">1. Section A<ol style="list-style-type: none">1.1 overview...2. Section B<ol style="list-style-type: none">2.1 overview... <p>the {{toc}} macro cannot distinguish between 1.1 and 2.1, since it uses #overview# for both, thus ending up in 1.1</p> <p>Redmine version: 1.1.2</p>

Revision 8871 - 2012-02-14 09:09 - Jean-Philippe Lang

Fixed: {{toc}} uses identical anchors for subsections with the same name (#8194).

History

#1 - 2011-04-20 09:59 - Etienne Massip

- Category set to Wiki
- Target version set to Candidate for next major release

Anchor name could be preppend with parent title anchor.

I would like to +1 this.

And maybe extend the requirement by allowing custom anchor names. Would be most useful in wiki when trying to write a use guide that would produce a "pretty and informative url"

i.e.

!h1. Transaction

..blah blah blah...

!h2. Expense

..blah blah blah...

!h3. Bank

..blah blah blah...

h4![[transaction-expense-bank-bank-fees|Bank Fees]].

To enter a bank fee click...

- *Status changed from New to Resolved*
- *Assignee set to Jean-Philippe Lang*
- *Target version changed from Candidate for next major release to 1.3.2*
- *Resolution set to Fixed*

Etienne Massip wrote:

| *Anchor name could be preppend with parent title anchor.*

This is not bullet-proof as it wouldn't make unique anchors with the following:

- 1. Section A
 - 1.1 overview
 - 1.1.1 subsection
- ...
- 2. Section B
 - 2.1 overview
 - 2.1.1 subsection

I fixed it in r8871 by using -2, -3... at the end of anchors (similar to what mediawiki does).

This is out of the scope of this fix but you can use h1(#anchor). to have custom anchors. This is part of the textile syntax.

Thank you very much.

This will do just fine.

#6 - 2012-03-05 13:42 - Jean-Philippe Lang

- Status changed from Resolved to Closed

Merged.
