

Redmine - Defect #8256

404 on repository revision access using git

2011-04-30 10:27 - Mathias Baumann

Status:	Closed	Start date:	2011-04-30
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	SCM	Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:	Duplicate		
Description 1. Commit and push a new revision to your git repository 2. Load the url pointing to that commit in your browser: http://.../&lt;project&gt;/repository/revisions/&lt;hashstart&gt; . You will get a 404. 3. Load the repository overview page http://.../&lt;project&gt;/repository/ 4. Load the previous url again. Everything works now. Thus Redmine only learns about new revisions ones you loaded the overview page of the repository before. Fix sounds simple. Add the call to update the repository to the revision access, too.			
Related issues: Is duplicate of Redmine - Defect #7146: Git adapter lost commits before 7 day... <div>Closed2010-12-21</div>			

History

#1 - 2011-04-30 10:50 - Toshi MARUYAMA

- Status changed from New to Closed
- Resolution set to Duplicate

Duplicate of [#7146](#).

#2 - 2011-04-30 11:00 - Mathias Baumann

Could you explain why this is a duplicate of [#7146](#)? I can't find any relation besides that its both about git and about revisions.
