

## Redmine - Feature #8409

### single email for bulk updates

2011-05-20 00:03 - Kioma Aldecoa

<b>Status:</b> New	<b>Start date:</b> 2011-05-20

<b>Category:</b> Email notifications	<b>Estimated time:</b> 0.00 hour
<b>Target version:</b>	
<b>Resolution:</b>	
<b>Description</b>	
<p>Right now, after doing a bulk update (change status, change target version, etc) of many issues results in an email notification going out for each user.</p> <p>Instead it would be very nice to consolidate the updates into one email.</p> <p>For example if changing status from new to accepted, a single email like this could go out:</p> <p>The following issues were changed from status New to Accepted:</p> <ul style="list-style-type: none"><li>* 12345 -- single email for bulk updates</li><li>* 12346 -- All words keeps on getting checked</li><li>* 12347 -- Grant access to particular Wiki page</li></ul> <p>With larger projects there is such a deluge of emails that it is of little value to have email updates at all.</p>

### History

#### #1 - 2011-05-20 05:38 - Terence Mill

dupe of [#8241](#), see "Notification schedule"

#### #2 - 2011-06-03 08:54 - Etienne Massip

- *Category set to Email notifications*

#### #3 - 2013-03-20 16:04 - Arin Lipman

I don't see how this is a dupe of [#8241](#). The issue here is that a bulk edit of issues will send out an email for each updated issue. The request is that instead of multiple emails, send one email notification that contains all the updated issues.

Depending on the project, a lot of emails get sent out daily. It would be great to have some option to collect several updates to issues/projects within a specified timeframe into a single notification email.
