History

#1 - 2011-05-26 22:16 - Terence Mill

related to <u>#8417</u> in terms of positining fields.

The input type configuration shall be part of the global config, not like the issue form layout which is configurable per tracker, like described in #8417

#2 - 2011-12-07 12:44 - Harry Garrood

+1 - I would like to see this too

#3 - 2012-07-18 23:53 - Terence Mill

covered by Feature #8417 "per tracker configurable issue form layout with preview"

#4 - 2017-02-12 03:38 - Go MAEDA

- Is duplicate of Patch #21705: Option for long text custom fields to be displayed using full width added

#5 - 2017-02-12 03:39 - Go MAEDA

- Status changed from New to Closed
- Resolution set to Duplicate

Very similar feature was implemented by $\frac{#21705}{100}$ for upcoming Redmine 3.4.0. I am closing this issue as a duplicate of it.
