

Redmine - Defect #8472

Private checkbox ignored on issue creation with "Set own issues public or private" permission

2011-05-31 12:23 - Alexis U.

Status:	Closed	Start date:	2011-05-31
Priority:	High	Due date:	
Assignee:		% Done:	0%
Category:	Issues permissions	Estimated time:	0.00 hour
Target version:	1.2.1	Affected version:	1.2.0
Resolution:	Fixed		
Description			
When a user creates a private issue, everybody who can view issues (defined in issue tracking permissions) can see it as if it was public.			
Ruby version 1.8.7 (i486-linux)			
RubyGems version 1.3.5			
Rack version 1.1			
Rails version 2.3.11			
Active Record version 2.3.11			
Active Resource version 2.3.11			
Action Mailer version 2.3.11			
Active Support version 2.3.11

How is set your roles issue visibility ?

Did you run migrations ?

#2 - 2011-05-31 13:34 - Alexis U.

Hi,

The Set issues public or private parameter is set to true only for the manager role.

The developer has his Set own issues public or private set to true, everybody else has it set to false.

And yes, I run a migration from the version 1.1.3

- File *issue_visibility_combo.PNG* added

Sorry, I meant the "Issue visibility" combo :

issue_visibility_combo.PNG

#4 - 2011-05-31 15:00 - Alexis U.

When two users have a developer role on the same project, with the 'Issues visibility' set to 'All non private issues' for that role, if developer A creates a private issue (with the status new), developer B can see it and update it.

Furthermore, an anonymous member can also see it (while his issue visibility is also set to 'All non private issues').

It behaves as if the Issue tracking > View Issues parameter was not taking into account the private/public parameter of the issue.

#5 - 2011-05-31 17:19 - Jean-Philippe Lang

Can not reproduce this issue. Any plugin installed?

#6 - 2011-05-31 17:24 - Alexis U.

Only one: the Redmine Theme Changer plugin.

#7 - 2011-06-01 15:08 - Marc Baucher

I have reproduced :

- if "Set issues public or private" is checked and "Set own issues public or private" is checked, private flag is registered at issue creation
- if "Set issues public or private" is **unchecked** and "Set own issues public or private" is checked, it does not work

#8 - 2011-06-01 18:57 - Jean-Philippe Lang

- *Subject changed from Private issue visible by everyone to Private checkbox ignored on issue creation with "Set own issues public or private permission*
- *Category set to Issues permissions*
- *Priority changed from Normal to High*
- *Target version set to 1.2.1*

Got it. Actually, the "Private" checkbox is ignored when the user creates an issue and has only the "Set own issues public or private" permission. The issue is not created as a private issue.

#9 - 2011-06-01 18:58 - Jean-Philippe Lang

- *Subject changed from Private checkbox ignored on issue creation with "Set own issues public or private permission to Private checkbox ignored on issue creation with "Set own issues public or private" permission*

#10 - 2011-06-01 19:16 - Jean-Philippe Lang

- *Status changed from New to Resolved*
- *Resolution set to Fixed*

Fixed in r5991.

#11 - 2011-06-06 10:13 - Alexis U.

Great! It works fine, thanks a lot!

#12 - 2011-07-02 19:26 - Jean-Philippe Lang

- Status changed from Resolved to Closed

Merged in 1.2-stable.
