

Redmine - Feature #8491

[Gantt] Wrap words in issue names

2011-06-01 18:03 - Alex A

Status:	Closed	Start date:	2011-06-01
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Gantt	Estimated time:	0.00 hour
Target version:			
Resolution:	Wont fix		
Description			
Is it possible to make word wrapping for issue names in Gantt chart? If issue name is long it truncates in Gantt chart (html, pdf or png). May be the right way is wrap words for this issues? Because it isn't understandable what is the issue means in pdf if it's truncated.

Actually, in html, you got a tooltip with the full issue subject.

ok, and what about pdf?

#3 - 2011-06-02 18:21 - Etienne Massip

Well, you don't :D

+1
Being able to view entire text on Gantt would make it a lot faster to identify issues on html and pdf.
At least it should be something definable by CSS

- Status changed from New to Closed

- Resolution set to Wont fix

In Redmine 4.0, you can resize the subject column and see the entire subject. Please see [#20481](#).
