#### History

##### #1 - 2011-09-27 18:06 - Etienne Massip

- Category set to Email notifications

##### #2 - 2019-02-11 01:41 - Go MAEDA

- Has duplicate Defect #13467: Tracker notification emails lack "To:" header, violating RFC2822 added

##### #3 - 2019-02-11 02:02 - Go MAEDA

Since Redmine 4.0.0 and later send emails per recipient ([#26791](#)), now we can set the recipient of the message in the To field when "Blind carbon copy recipients (bcc)" is enabled.

The following table is the idea of the new behavior.

"Blind carbon copy recipients (bcc)" setting	To Field
Disabled	All recipients (The same behavior with the current version)
Enabled	Only the recipient of the message

##### #4 - 2019-02-11 15:56 - Go MAEDA

- Blocked by Defect #30787: Other recipients are not listed in To field even if Setting.bcc\_recipients is false added

##### #5 - 2019-02-20 01:15 - Go MAEDA

- Related to Feature #30820: Drop setting "Blind carbon copy recipients (bcc)" added

##### #6 - 2021-10-03 21:12 - Marius BĂLTEANU

- Status changed from New to Closed

- Resolution set to Fixed

This setting was dropped in the meantime so we can consider this issue fixed.
