Description

If you check "Blind carbon copy recipients (bcc)" in email notifications, the recipient will be empty. It could be filled at least with the admin (or single user), to avoid the spam filter to mark it as fraud.

- Category set to Email notifications

#2 - 2019-02-11 01:41 - Go MAEDA

- Has duplicate Defect #13467: Tracker notification emails lack "To:" header, violating RFC2822 added

#3 - 2019-02-11 02:02 - Go MAEDA

Since Redmine 4.0.0 and later send emails per recipient ([#26791](#)), now we can set the recipient of the message in the To field when "Blind carbon copy recipients (bcc)" is enabled.

The following table is the idea of the new behavior.

"Blind carbon copy recipients (bcc)" setting	To Field
Disabled	All recipients (The same behavior with the current version)
Enabled	Only the recipient of the message
