

Redmine - Defect #8547

Add member list not showing all users

2011-06-06 22:19 - Jeremy Holland

Status:	Closed	Start date:	2011-06-06
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Project settings	Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:	Duplicate		
Description			
<p>When editing a project's settings and adding members via the members tab, the list of members on the right (one checkbox per user and/or group) does not show all users / groups in the system. The appropriate users and/or groups will appear in the list if it is filtered by the search text input, but they do not appear to show up natively. Specifically, it appears that its cutting off the list halfway through the alphabet, i.e. paginating without providing any pagination controls.</p>

History

#1 - 2011-06-10 12:42 - Etienne Massip

Not a defect, the user list is purposely limited to 100 first users.

I don't think there's need to raise or remove this limit : most of time you'll manage project permissions via roles and exceptionally you'll want to grant a specific user some particular rights. As this is an exceptional situation, you can then use the autocomplete search input.
