

Redmine - Defect #8582

RuntimeError (Your PostgreSQL connection does not support unescape_bytea. Try upgrading to pg 0.9.0 or later.)

2011-06-10 08:46 - Alex A

Status:	Closed	Start date:	2011-06-10
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Affected version:	1.2.0
Resolution:	Invalid		

Description

When i try export wiki to html or txt on redmine 1.2-stable (CentOS release 5.6) and postgresql (8.1.23) this error occurs.

RuntimeError (Your PostgreSQL connection does not support unescape_bytea. Try upgrading to pg 0.9.0 or later.):

Not a Redmine issue but a config one.

Try to remove and gem install pg -- --with-pg-config=<path to pg8.1.23_config> as specified by <https://bitbucket.org/ged/ruby-pg/wiki>.

Unfortunately, this reinstalling does not help for me. Any ideas?

#3 - 2011-06-10 15:57 - Etienne Massip

Try using postgres-pr adapter instead of pg, it does not work very well with bytea and pg 9.x but maybe better with 8.x.

#4 - 2011-06-15 13:41 - Etienne Massip

- Status changed from New to Closed

- Resolution set to Invalid

Setup issue.

#5 - 2011-06-24 13:13 - Gilles Cornu

- Status changed from Closed to Reopened

I am also facing the same problem with following stack:

- Ubuntu 8.04.4 LTS, with standard packages:
 - PostgreSQL 8.3.15
- Gems:
 - postgres-pr 0.6.3

As mentioned in [\[\[RedmineInstall#Database\]\]](#), postgres-pr is unmaintained and 0.6.3 seems to be the last release...

I'll study following changes on my side:

- switch to **pg** instead postgres-pr and test if it works with PostgreSQL 8.3.15
- install a backport of PostgreSQL 8.4 or 9.x for Ubuntu 8.04LTS

But anyway I think that Redmine Release Management should either:

- update [\[\[RedmineInstall#Database\]\]](#) accordingly to new stack requirements for Redmine 1.2.0 (postgres-pr no more compatible ? Minimum PostgreSQL 8.4 ?).

or

- fix Redmine 1.2.1 to be able to integrate with older PostgreSQL 8.x + postgres-pr 0.6.3

- *update [\[\[RedmineInstall#Database\]\]](#) accordingly to new stack requirements for Redmine 1.2.0 (postgres-pr no more compatible ? Minimum PostgreSQL 8.4 ?).*

There is already some information in [\[\[RedmineInstall#Database|RedmineInstall#Database\]\]](#).

or

- *fix Redmine 1.2.1 to be able to integrate with older PostgreSQL 8.x + postgres-pr 0.6.3*

This is not a Redmine bug (hence the status).

For me installing 'pg' instead 'postgres-pr' resolved the problem. What is your status Alex ?

Etienne Massip wrote:

| *Try using postgres-pr adapter instead of pg, it does not work very well with bytea and pg 9.x but maybe better with 8.x.*

Feedback on my configuration changes after meeting this *unescape_bytea problem*: - Problem could be fixed by replacing postgres-pr 0.6.3 (gem uninstalled) with **gem pg 0.9.0**

- Note: I could not test with versions 0.10.x or 0.11.x because they require Ruby >= 1.8.7. Since I'm running with Ruby 1.8.6 (which is standard on Ubuntu 8.04LTS), I had to install version 0.9.0.

- I propose to enhance the Wiki Documentation by stressing out in [\[\[RedmineInstall#Database|RedmineInstall#Database\]\]](#) that postgres-pr is no more 100% compatible with all the features of Redmine 1.2.0 (and later ?)

#8 - 2011-07-28 00:08 - Sudheer Prem L S

I uninstalled 'pg' and 'postgres-pr' and re-installed 'pg' alone with the following command and it resolved the issue

```
gem install pg -- --with-pg-lib=<pg_home>/lib --with-pg-config=<pg_home>/bin/pg_config
```
