

## Redmine - Patch #8588

### Rakefile for rake 0.9.2

2011-06-10 18:12 - C. X.

<b>Status:</b> Closed	<b>Start date:</b> 2011-06-10
<b>Priority:</b> Normal	<b>Due date:</b>
<b>Assignee:</b>	<b>% Done:</b> 0%

<b>Target version:</b>	
<b>Description</b>	
Hello,	
when you are using rake 0.9.2 and try to generate the session store you will get following error:	
<pre>(in /var/www/redmine) rake aborted! uninitialized constant Rake::DSL /usr/lib/ruby/1.8/rake.rb:2503:in `const_missing' /var/lib/gems/1.8/gems/rake-0.9.2/lib/rake/tasklib.rb:8 /usr/lib/ruby/1.8/rubygems/custom_require.rb:31:in `gem_original_require' /usr/lib/ruby/1.8/rubygems/custom_require.rb:31:in `require' /var/lib/gems/1.8/gems/rake-0.9.2/lib/rake/testtask.rb:4 /usr/lib/ruby/1.8/rubygems/custom_require.rb:31:in `gem_original_require' /usr/lib/ruby/1.8/rubygems/custom_require.rb:31:in `require' /var/www/redmine/Rakefile:7 /usr/lib/ruby/1.8/rake.rb:2383:in `load' /usr/lib/ruby/1.8/rake.rb:2383:in `raw_load_rakefile' /usr/lib/ruby/1.8/rake.rb:2017:in `load_rakefile' /usr/lib/ruby/1.8/rake.rb:2068:in `standard_exception_handling' /usr/lib/ruby/1.8/rake.rb:2016:in `load_rakefile' /usr/lib/ruby/1.8/rake.rb:2000:in `run' /usr/lib/ruby/1.8/rake.rb:2068:in `standard_exception_handling' /usr/lib/ruby/1.8/rake.rb:1998:in `run' /usr/bin/rake:28</pre>	
The mistake is fixed with adding <b>require 'rake/dsl_definition'</b> before <b>require 'rake'</b> in the Rakefile.	

### History

#### #1 - 2011-06-11 21:50 - Szymon Połom

I can confirm this issue with Redmine 1.2.0 on Debian Squeeze with Rake 0.8.7.

The provided patch solved my problem.

#### #2 - 2011-06-20 04:21 - Jean-Baptiste Barth

- Status changed from New to 7

- Assignee set to Jean-Baptiste Barth

Did you notice any other incompatibilities with rake 0.9.2 ? I saw other warnings, and even errors but it was on an experimental branch with bundler enabled. I'll have a look at this anyway. For now, I updated the wiki to encourage the use of rake 0.8.7 ([RedmineInstall](#)).

#### #3 - 2011-08-12 14:43 - john s.

on which rakefile file i have to make the patch?

best regards john s.

#### #4 - 2011-09-05 04:27 - Bruno Medeiros

Same issue on Ubuntu 11.04, rake 0.8.7

The patch fixed the problem.

My output after patch was:

```
root@brunoajcm-htpc:/opt/redmine/current# rake generate_session_store
(in /opt/redmine/redmine-1.2)
/var/lib/gems/1.8/gems/rake-0.9.2/lib/rake/file_utils.rb:10: warning: already initialized constant RUBY
/var/lib/gems/1.8/gems/rake-0.9.2/lib/rake/file_utils.rb:84: warning: already initialized constant LN_SUPPORTE
D
rake/rdoctask is deprecated. Use rdoc/task instead (in RDoc 2.4.2+)
```

Hope it helps.

#### #5 - 2011-09-05 09:30 - Etienne Massip

Obviously you're using rake 0.9.2 too.

#### #6 - 2011-09-12 16:41 - Bruno Medeiros

Obviously you're using rake 0.9.2 too.

Something is weird here... If i run rake -V in terminal, I got:

```
root@ubuntu-redmine:/opt/redmine# rake -V
rake, version 0.8.7
```

But when I run some rake command, it shows 0.9.2 as version in the stacktrace...

```
root@ubuntu-redmine:/opt/redmine/current# RAILS_ENV=production rake db:migrate
(in /opt/redmine/redmine-1.2)
/var/lib/gems/1.8/gems/rake-0.9.2/lib/rake/file_utils.rb:10: warning: already initialized constant RUBY
/var/lib/gems/1.8/gems/rake-0.9.2/lib/rake/file_utils.rb:84: warning: already initialized constant LN_SUPPORTE
D
...
```

Anyway, the patch fixed the problem.

#### #7 - 2011-09-15 15:53 - Anonymous

If you have both versions installed, you can run rake 0.8.7 rb:migrate.

#### #8 - 2011-09-15 15:54 - Anonymous

If you have both versions installed, you can run rake \_0.8.7\_ db:migrate.

I have the same problem with Redmine 2.0

update patch, like this :

```
#!/usr/bin/env rake
require File.expand_path('../config/application', __FILE__)
RedmineApp::Application.load_tasks
require 'rake/dsl_definition'
require 'rake'
require 'rake/testtask'
```

the command `rake generate_secret_token` work very well with rake 0.9.2, not with 0.8.7

#### #10 - 2012-06-10 22:42 - Jean-Baptiste Barth

- Assignee deleted (Jean-Baptiste Barth)

#### #11 - 2012-07-05 14:42 - C. X.

Please use next time the `pre` tag. Otherwise someone can't see the underscores of your File constant.

I only needed following:

```
require File.expand_path('../config/application', __FILE__)
require 'rake/dsl_definition'
```

```
RedmineApp::Application.load_tasks
```

But I got two warnings now:

```
/var/lib/gems/1.8/gems/rake-0.9.2.2/lib/rake/file_utils.rb:9: warning: already initialized constant RUBY
/var/lib/gems/1.8/gems/rake-0.9.2.2/lib/rake/file_utils.rb:86: warning: already initialized constant LN_SUPPORT
TED
```

Obviously you're using rake 0.9.2 too.

This is incorrect.

The gem rake version you use is version 0.9.2, but the system rake version is 0.8.7.  
This is something that happens when you install rake using the default repositories.

If you are running on debian you can fix this problem by uninstalling the current rake version with:

```
apt-get uninstall rake
```

afterwards download the version you require (0.9.2+) from:

<http://packages.debian.org/sid/all/rake/download>

This fixed the following warning messages for me:

```
/var/lib/gems/1.8/gems/rake-0.9.2.2/lib/rake/file_utils.rb:9: warning: already initialized constant RUBY
/var/lib/gems/1.8/gems/rake-0.9.2.2/lib/rake/file_utils.rb:86: warning: already initialized constant LN_SUPPOR
TED
```

**#13 - 2013-01-13 21:04 - Jean-Philippe Lang**

- Status changed from 7 to New

Assigned issue with no assignee back to New status.

**#14 - 2018-10-09 13:16 - Go MAEDA**

- Status changed from New to Closed

I think we don't have to take care of this issue now because rake 0.9.2 is too old and we are using newer versions of rake.
