Target version:	1.3.0	Affected version:	1.2.0
Resolution:	Fixed		
Description			
whenever I raked something(like, rake db:migrate), I got this warning:			
<pre>rake/rdoctask is deprecated. Use rdoc/task instead (in RDoc 2.4.2+) WARNING: 'task :t, arg, :needs => [deps]' is deprecated. Please use 'task :t, [args] => [deps]' instead. at D:/RubyOnRails/projects/redmine/lib/tasks/email.rake:170</pre>			
it's a minor problem for now, just to report it.

- Status changed from New to Closed

- Resolution set to Invalid

Not a redmine issue, just a rake/RoR compatibility warning.

#2 - 2011-06-20 04:12 - Jean-Baptiste Barth

It's more than a compatibility warning I think, some rake tasks don't work for me with rake 0.9.2. I recommend sticking with rake 0.8.7 for now.

#3 - 2011-09-15 15:55 - Anonymous

If you have both versions installed, you can run `rake _0.8.7_ db:migrate`.

- *Target version set to Candidate for next major release*
- *Resolution deleted (Invalid)*

Actually the syntax is supported at least since Rake 0.8.3, so we could remove this warning.

Sorry, I was referring to the WARNING part.

RDoc deprecation fixed.

Backed out [r7541](#) with [r7542](#) since the build failed, needs some new commit after build environment update.

Fix applied with a more friendly way to deal with a missing rdoc gem, considering that 99.9% of users just rake db:migrate and do not need it.
