<b>Target version:</b>		<b>Affected version:</b>	1.2.0
<b>Resolution:</b>			

#### Description

I have an issue with many updates and it takes about 30 s to generate page when textile is on. Turning off textile reduces this time to about 4 s.

I've tried to enable "Cache formatted text" but it seems to only cache issue description. It would be nice if also updates could be cached.

Workarounds and/or hints are also welcome :)
