

Redmine - Feature #8669

Combine roles status rights and allow to use shortcuts when changing status

2011-06-22 15:57 - Terence Mill

Status:	New	Start date:	2011-06-22
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Issues workflow	Estimated time:	0.00 hour
Target version:			
Resolution:			
Description			
<p>If a user has a roleA with right to set status status1 to status2 and also own a role thta has rights to set status2 to status3, he i still not able to set status1 to status3 in one step. He has to make two issue changes (status1>status2>status3). This is useless.</p> <p>The alorithm shall not only go one step from actual role to next possible status, but check all reachables status for all roles the user owns.</p>			

History

This is right. It would be better to use a combination. This will keep the issue history smaller.
