

Redmine - Patch #8757

Add hook for bulk edit post-save state

2011-07-06 23:40 - Ramesh Nair

Status: New	Start date: 2011-07-06
Priority: Normal	Due date:
Assignee:	% Done: 0%
Category: Hook requests	Estimated time: 0.00 hour
Target version:	
Description	
<p>There is a hook which gets invoked just after an individual issue gets updated, which allows for plugins to perform any post-save actions. There ought to be a similar hook for when a number of issues have been updated via the bulk-editing process. I've patched the core code to enable such a hook - `controller_issues_bulk_edit_after_save`.</p> <p>Patch available at https://github.com/7citylearning/redmine/commit/f88c6ca01e89246b5bcd62fa26cc651ee33ba212</p>

+1. Some of the webhook plugins out there is not complete because of this hook missing, for example [Redmine Webhook](#).

I've no idea why this takes so long to be merged. There was even a patch 4 years ago: #5714. I mean, how hard can it be to add this one liner into issues_controller.rb?

```
call_hook(:controller_issues_bulk_edit_after_save, { :params => params, :issue => issue, :journal => journal })
```

#3 - 2015-04-25 03:50 - Hiroshi Miura

+1. To improve user productivity with webhook or other plugins, and chat platforms such as hipchat, slack, kandan and hubot.

#4 - 2016-04-22 22:51 - Adam Pfeiffer

I absolutely need this as well. It does seem to be a simple change that should have been there from the beginning. I will modify my code locally to make sure this works with my plugin.

TThanks

+1

I would like to see that change in the next version.

Is this change too risky or too dirty ?

Does it need to be adapted before acceptance ?

- File *issues_controller_bulk_update_after_save_hook.patch* added

I just created a patch for this issue that applies to the current master code base. Please find it attached.

- Related to Feature #25454: Add bulk edit after save hook added

#10 - 2017-04-25 09:51 - Serghei Zagorinyak

This patch is wrong.

Implemented this way, if an exception is raised within `bulk_edit_after_save` it will prevent succeeding issues from being saved while they should be processed and only the problematic issue should be rejected.

#11 - 2017-04-25 21:18 - Tobias Böhm

You are right, exceptions raising from the hook are not handled. But this applies also to the already existing hook `:controller_issues_bulk_edit_after_save`. If an exception is raised there, all following issues will not be processed.

This should be addressed for the whole process (before-hook, save, after-hook) or loop at once, I guess, in a separate issue and patch.

Yes, didn't notice that first. Hope this will be fixed someday.

- File controller_issues_bulk_edit_after_save.patch added

Patch based on redmine v3.4.6

To avoid the problems with stopping the bulk update if something fails on the hook, iterate over the saved issues after saving them.

+1

I am modifying a plugin that reads journal of bulk edit issues, too.

https://github.com/jcppkkr/redmine_hipchat/commit/45d740de41bcaa68f64d5def16a9367e6291ed8b#diff-a7f255c397e668f358fc183f6802c3f3R25

#19 - 2019-01-28 18:30 - Julián Maestri

Any chance for this to be included in the roadmap? at least as Unplanned?
