## History

### #1 - 2007-08-12 08:52 - Jean-Philippe Lang

Hi,

Initially, null values for version dates were not allowed. The change was done in migration 48 but it seems to have no effect with SQLite, and thus null values are still not allowed with this database.

I've fixed the initial table creation but if you want to keep

your data, you'll need to:

1. export your data
2. create a new database (with redmine rev 611 or higher), using  
rake db:migrate
3. import your data in the new database

Regards
