Description	
<p>Hi all,</p> <p>an activity message when somebody commits to the project's repository looks like this:</p> <p>19:04 Myproject Revision 505:ea8b0f632816: done something John Doe</p> <p>(I use Mercurial, but I think that this may apply to other SCMs, too)</p> <p>This is fine, of course, but one thing would be really great - mentioning the branch number somewhere, so it could look like</p> <p>19:04 Myproject Branch 1.2lala, Revision 505:ea8b0f632816: done something John Doe</p> <p>If one works on a project with multiple branches that are developed simultaiously in the long term, the activity ouptut is not as informative as it could be and this would help a lot.</p> <p>I believe that this could be easy enough to fix, so if nobody else feels like writing a patch, I would appreciate some hints like what should be taken care of in order to make this working.</p> <p>The reason I am asking for help is that I don't know Ruby very much neither I know the Redmine project.</p>
