Description

When using context menue in issue i see a hint "loading.." which inform the user besides regular browser loading icon that browser is wating for request,
I would be nice to gave that "loading.." hint showed especially for long running requetsts as for batch issue operation.
At the moment this hint is not showed, a si suspect that is an error. Maybe its a feature, whatever it should be changed in sense of usability.

History

#1 - 2011-07-29 17:36 - Jean-Philippe Lang

- Tracker changed from Defect to Feature

- Subject changed from "loading hint" not showed during issue batch operation to Show "loading hint" during issue batch operation

Not a defect since the "loading hint" is shown during ajax requests only.
These batch operations are not ajax requests, you can see the loading icon of the browser during it.

#2 - 2011-07-30 01:35 - Terence Mill

The user doesn't separate between ajax and non ajax, that is pure technology thing. But having a extra visualization for predictable long running requests makes sense instead of browser "loading hint" only.
