<b>Description</b>			
<p>I use the WebDav-Plugin to manage my documentes. With Redmine i can create a new document with characters(&lt; &gt; ? " :   \ / *) that cant handle by windows.</p> <p>All i need is to add a "validates_format_of" in app/models/document.rb with regex <code>^([\&lt;&gt;\?": \\\/\*]+\Z/i</code>. The Regex filters the caracters(&lt; &gt; ? " :   \ / *). If one of these found, we get an error.</p> <p>After line 30:</p> <pre>... validates_presence_of :project, :title, :category validates_length_of :title, :maximum =&gt; 60 # valid title (filename) for Windows validates_format_of :title, :with =&gt; /\A([\&lt;&gt;\?": \\\/\*]+\Z/i, :on =&gt; :save  named_scope :visible, lambda { *args  { :include =&gt; :project,                                      :conditions =&gt; Project.allowed_to_condition(args.shift     User.current, :view_documents, *args) } } ...</pre> <p>Source: <a href="http://en.wikipedia.org/wiki/8.3_filename#Directory_table">http://en.wikipedia.org/wiki/8.3_filename#Directory_table</a></p> <p>This excludes the following ASCII characters: " * / : &lt; &gt; ? \   Windows/MSDOS has no shell escape character</p> <p>I hope u add this to core :)</p>			

### History

#### #1 - 2011-07-28 20:42 - Terence Mill

+1 to be able to use "PluginWebDav":projects/redmine/wiki/PluginWebDav with windows.

Its more a bug in context of the plugin than a feature.

- Status changed from New to Closed

Old issue + this could be done in the plugin I think
