

## Redmine - Feature #8946

### Permissions for saving queries

2011-07-29 23:07 - Stephen Lewis

<b>Resolution:</b> Duplicate	
<b>Description</b> Not sure if this should be a defect or a feature suggestion...  Under roles and permissions, there is a check box "save queries". When unchecked a user is unable to save any queries. When checked, the user can save queries as both private and public. I want users to have the ability to save queries for their own private use, but not clutter the system with public queries.	
<b>Related issues:</b> Is duplicate of Redmine - Defect #8729: Not-public queries are not private <b>Closed</b> <b>2011-07-01</b>

Actually it's a feature request, and it makes sense for me. Any other opinion ? We could split up actual permission in two permissions, "Save queries" and "Make queries public".
