History

#1 - 2011-08-02 12:27 - poornima biradar

After referring to the correct versions of rails and rack supported by redmine on <http://www.redmine.org/projects/redmine/wiki/RedmineInstall> for redmine 1.2.1, i run following

```
sudo gem install rails -v=2.3.11  
sudo gem install rack -v=1.1.0
```

now

```
i18n (0.5.0, 0.4.2)  
rack (1.2.3, 1.1.2, 1.1.0)  
rails (3.0.9, 2.3.11)  
rake (0.9.2)  
rubygems-update (1.8.6)
```

but still i get the same error

#2 - 2011-08-04 22:17 - Jean-Baptiste Barth

You shouldn't run the rake tasks with "sudo". And you could provide the trace of the task when adding a --trace option to the rake task, could be useful...

#3 - 2011-08-05 14:51 - Marco Scialino

- File rake_db_migrate.log added

Hi,

I'm experiencing the very same problem too.
Differently from poornima biradar I did not use "sudo", but I got the same error.
Here is my config.

```
i18n (0.6.0, 0.5.0, 0.4.2)
rack (1.1.1)
rails (2.3.11)
rake (0.8.3)
gem 1.8.6
ruby 1.8.7 (2008-08-11 patchlevel 72) [i686-linux]
```

Please also see attached file with output of task with --trace option

Hope this helps.

Marco

#4 - 2011-08-08 17:37 - Patrick Figel

<http://www.redmine.org/projects/redmine/wiki/RedmineInstall> says that you need rake 0.8.7. You're using 0.8.3/0.9.2.

Try `gem install rake -v 0.8.7`

#5 - 2011-08-23 16:22 - Etienne Massip

- *Status changed from New to Closed*

- *Resolution set to Duplicate*

RubyGems > 1.6 is not supported, check [RedmineInstall](#).

Closed as duplicate of [#8325](#).
