```

i run following commands:

- rake db:decrypt RAILS_ENV=production
- touch tmp/restart.txt
- set a simpler value (alphanumeric) for the cipher key
- rake db:encrypt RAILS_ENV=production
- touch tmp/restart.txt

At this times the error was gone.

I check in the database: the account_password field of auth_source table was encrypted.

Modifying again the value of the key (with the first value used) don't trigger the error

Then few hours after I got this error:

```

About the second error, check #7857.

#2 - 2011-08-29 10:39 - Pierre-Louis Bonicoli

Thanks, second error is probably same problem as #7857. If the second error persists, I will update #7857.
