Would be nice if you could attach path to issue (see Contribute) since GitHub mirror is not officially supported.

Oups, I'm sorry... I saw some github Pull-Requests linked to Redmine tickets that were handled and closed by Toshi MARUYAMA, and thus thought it was a new supported way to supply patches. I'll read more carefully Contribute and will update this patch proposal as soon as possible...

I don't have a permission to close pull requests on github unofficial mirror.
