Description			
Hi,			
The wiki toolbar is a bit bogus under IE (6 and 7 also affected): the cursor is not positioned correctly. I've fixed it so a patch attached. As I see it is working now with Firefox and IE also.			
BR,			
Balazs

the cursor is not positioned correctly.

Could you give more details about this problem ?  
The wiki toolbar works fine for me under IE6.

#2 - 2007-08-17 08:50 - Balazs Dan

If you click on link button then it will include this string: [[]]  
But the position of the cursor (caret) should be inside square brackets. It is positioned well under firefox, but not under IE6 and 7. On IE the cursor positioned after brackets.

#3 - 2007-08-17 08:59 - Jean-Philippe Lang

OK, I didn't know about this bug since I don't use IE very often.  
Thanks for this fix (committed in rev 654).

Jean-Philippe

Sorry!  
Tried to refresh my explorer window..
