Redmine - Feature #9207

Ability for administrator to hide projects he is not member of from the projects page

2011-09-08 14:29 - Jan Mach

Status: Closed Start date: 2011-09-08 Priority: Normal Due date: Assignee: % Done: 0% Category: Projects Estimated time: 0.00 hour Target version: Fixed 0.00 hour Image: Comparison Poscription Fixed Comparison of the Redmine instance is used to manage multiple projects. Sometimes the number of the projects and subprojects can be so high, that the project list is very long. If the Redmine administrator himself is participating in some projects, it can be tedious to soroll down the list and try to find the proper project. Same domine is with the project suber of the some sort in the upper right correr. Proposed solutions: 1. On the PROJECTS page, there should be listed only the projects the current user is member of. There could be a checkbox of some sort, which would add the public projects to the list as well. or 3. On the MyPage, there should be a block available, which would current user is member of. There could be a checkbox of some sort, which would add the public projects to the list as well. or 3. On the MyPage, there should be a block available, which would current user is member of. #2 - 2012-02-01 17:03 - Dariusz Kowalski

+1

#3 - 2017-03-29 14:18 - Marcio Formiga

Does anyone know of a plugin that do the same thing? I have exactly the same problem, it's really annoying.

#4 - 2020-02-15 16:21 - Marius BĂLTEANU

- Is duplicate of Feature #29482: Query system for Projects page added

#5 - 2020-02-15 16:21 - Marius BĂLTEANU

In Redmine 4.1.0 you can now filter the Projects list and save custom queries, please see #29482 for more details.
