

Redmine - Defect #9337

Out of memory when browsing subversion repository with large changeset

2011-09-28 15:19 - Wolf Wolfswinkel

Status:	Closed	Start date:	2011-09-28
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Affected version:	1.2.1
Resolution:	Duplicate		
Description			
<p>This appears to be the same issue reported by Jeremy Brown in the last update of #7699 which was added after that defect was set to resolved.</p> <p>I attached an exiting subversion repository to a redmine project. When browsing the repository, ruby1.8 invokes the oom-killer (according to /var/log/messages on ubuntu).</p> <p>Inspired by #7699, I changed the batch size to 1 in app/models/repository/subversion.rb and turn on debug logging. This shows that the out-of-memory situation probably occur when a large changeset (>65000 changed paths) retrieved.</p> <p>Using svn 1.6.6.</p>
